THIS IS OUR NORTH CAROLINA

AND IT'S IN DANGER.

DONALD TRUMP ENDANGERS NORTH CAROLINA—AND NORTH CAROLINIANS.

President Trump's environmental policies threaten our North Carolina. President Trump threatens our beaches with offshore drilling, opposes safeguards against harmful chemicals in our drinking water, and puts our safety at risk with his denials of climate change.[1]

Our water and lands are polluted by toxic coal ash and chemicals. To protect special interests, Donald Trump relaxed rules for storing coal ash[2] and opposed classifying cancer-causing "forever chemicals" as hazardous.[3] These poisons are found in our drinking water – and they stay in our bodies. Forever.[4]

Trump's climate change denials[5] risk our health and economy. Despite stronger hurricanes and floods, Donald Trump remains in climate change denial. His denials put North Carolina's families and businesses at risk for future massive hurricanes[6] – and the devastation they bring.

From polluting our air and water to harming our health, Donald Trump's policies endanger us all.

WE DESERVE BETTER than President Trump.
