

“ SHORTLY AFTER I
GRADUATED HIGH SCHOOL,
I WAS DIAGNOSED WITH
CANCER.

4 out of 75 male students from my graduating class have had testicular cancer. My community is one of thousands across the country contaminated with cancer-causing chemicals known as PFAS.

THERE'S A BIPARTISAN PLAN TO CLEAN THESE CHEMICALS UP NATIONWIDE...

...BUT WHEN DONALD TRUMP SAID HE WOULD VETO IT, THAT STOPPED IT DEAD.”

- Craig Koller

candidate's committee.

WHEN **TRUMP** PROTECTS POLLUTERS, IT HAS CONSEQUENCES **FOR ALL OF US**

TOXIC CHEMICALS IN OUR WATER KNOWN AS PFAS HAVE
CONTAMINATED THOUSANDS OF COMMUNITIES NATIONWIDE.

PFAS are linked to cancer,
hypertension and a
weakened immune system—
and once they enter your
body, they never go away.

A plan to clean up these
chemicals has bipartisan
support. After Trump said
he would veto the plan, it
hasn't gone anywhere.

**DONALD TRUMP HAS
REAL CONSEQUENCES
FOR OUR HEALTH.**
