President Trump's environmental policies turned Arizona into **ASTHMAZONA.**

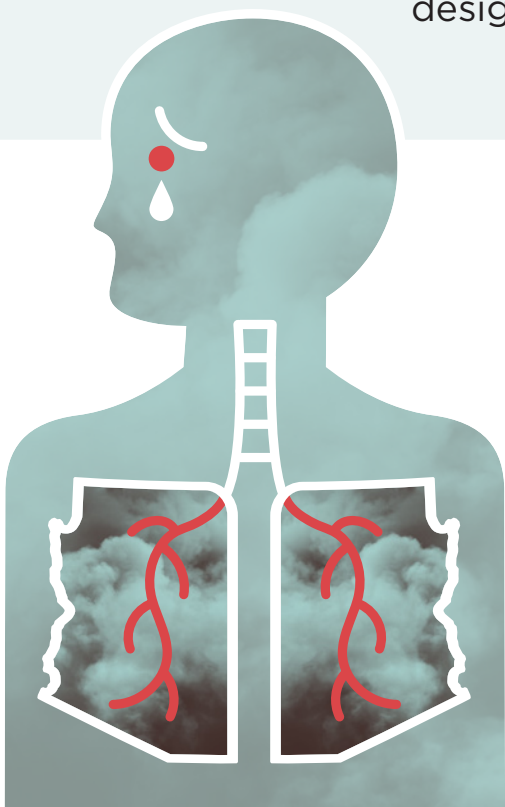

Asthma is a serious threat to Arizona's women, children, and communities of color.

Asthma rates are higher in Arizona than most of the country.¹ Children, communities of color, and the economically disadvantaged² are struggling for breath — and Trump is making it worse.

Trump gutted clean air protections, putting more harmful pollution into our air.

Arizona's ozone pollution is to blame and cars are the biggest source of that pollution.³ Trump's solution? To rollback the car emissions and fuel efficiency standards⁴ designed to protect our air — and our lungs.

Arizona should be known for its breathtaking beauty. NOT its breathtaking air.

OUR LUNGS CAN'T TAKE FOUR MORE YEARS OF DONALD TRUMP.
