DONALD TRUMP ROLLED BACK SAFEGUARDS, ALLOWING DANGEROUS CHEMICALS IN OUR DRINKING WATER.

TOXIC CHEMICALS, PESTICIDES, AND HUMAN WASTE FLOWING FREELY INTO OUR WATERWAYS.

The Trump administration stripped environmental protections away from 6 million acres of Florida's vital wetlands[1] and rolled back Clean Water Act rules. This allows farms, power companies, and developers to dump their pollutants into our waterways.[2]

CHEMICALS CAUSING CANCER AND BRAIN DAMAGE ARE GETTING INTO OUR DRINKING WATER.

The loosened rules allow a toxic stew of arsenic, agricultural pesticides, and leaky septic systems to flow freely into our public water supply. Dangerous chemicals known to cause cancer and damage to the health and well-being of Florida's children.

TRUMP'S DENIAL IS DANGEROUS TO OUR HEALTH.[3]

When Trump listens to industry insiders, instead of climate experts, he puts Florida's families at risk of disease from toxic drinking water, while corporate polluters benefit from deregulation.
