## Andrew Garbarino protects corporate polluters and leaves Long Islanders at risk.

In Albany, Andrew Garbarino sided with corporate polluters and voted against limiting dangerous greenhouse gas emissions – the largest contributor to climate change.<sup>1</sup>

On Long Island, climate change is already causing damage and costing residents. It is making storms like Sandy even worse, extending heat waves, and raising sea levels along the South Shore. If Andrew Garbarino gets his way, it will only get worse.<sup>2</sup>

## ANDREW GARBARINO WON'T PROTECT LONG ISLAND.
