REP. ELISSA SLOTKIN IS DELIVERING

“ONE OF THE BIGGEST BILLS TO FIGHT CLIMATE CHANGE, EVER.”¹

Strong leaders know that big problems require bigger solutions. That’s why Congresswoman Elissa Slotkin helped pass a long overdue plan to protect future generations from the carbon pollution that heats the planet causing climate change. The plan will:

Cut carbon pollution that causes climate change 40% by 2030.²

Reduce our dependence on foreign oil by increasing the use of American-made energy sources like solar and wind power.³

Save the average American family \$1,800 per year on energy bills, while working to prevent more irreversible damage to our planet.⁴
